

Central and Forward rapidity. η meson

Ana Marin

GSI, Darmstadt, Germany

February 17, 2022

Simulation settings

- ▶ Full simulations of pp $\sqrt{s} = 14$ TeV using PYTHIA 8.2 in local HD cluster (2.2×10^6 events generated)
- ▶ Analysis using MC information:
Central: $|\eta| < 1.3$ ($p_T > 0.1$ GeV/c)
Forward: $1.75 < |\eta| < 4$ ($p > 0.1$ GeV/c)

Central Barrel

Central Barrel. New Efficiency vs Old Efficiency
